Iris-tube™ Balloon Lights

Iris-tube creates creative lighting effects that make it an ideal lighting solution for special events, fashion shows, music festivals or as an integral part of a creative set. Multiple units can be connected together to make more complex shapes and structures, or they can be displayed separately to illuminate an area with radiant visual lines.

Lighting system of RGBW unit provides customizable color options that are controllable by DMX or via smart device connected through a Bluetooth application. As an inflatable lighting structure, Iris-tube is easy to handle and set up its contained pressure lock-air system keeps the unit inflated without the need for an internal fan. The light can either be mounted on the ground or suspended from truss or ceiling. For ground-mounted applications,

Length Size: 2.5m/4m/5m (8.2/13ft/16.4ft)
